It is very, useful for colitis, Crohn's disease, Celiac disease, irritable bowel syndrome, indigestion, excessive gas production, yeast like symptoms, cramps, arthritis, cold hands, cold feet, low energy in the body. The Immune System is in direct relation to the Gastrointestinal System. This relation is explained as follows:

Menstruation: You may use just one stone on your anal ring. It will help to reduce menstruation discomfort relatively.

An excellent digestive system means: perfect digestion at the level of the saliva, stomach and duodenum, small intestine is responsible of further digestion and selective absorption of intestinal juice in lymphatic system, large intestine is responsible of absorption with slower procedure and finally Rectum will work as security valve associated with excellent Liver, Pancreas function and bile production and healthy gall-

bladder function, which will result in perfect digestion right to the end of the Duodenum. It will take place when the Central Nervous system can control the Digestive System by controlling the Autonomic Nervous system. The completely digested product (duodenal juice) is rich in nutrients and ready to nourish normal friendly bacteria, which produce B vitamin's, to be absorbed almost completely along the intestinal tract. When we have excellent nutrient absorption we will have all the material to be metabolized at the level of the mitochondria to produce energy. This will result in a well-nourished, strong Immune system. However, if we do not have good digestion and absorption, the immune system, as well as other organs and systems, will be weakened, resulting in many undiagnosed illnesses. We need to have a non-inflamed, healthy small intestine, large intestine and stomach to produce physiological digestion and absorption.

1. Hold each piece of stone in your palms with closed hands for 15 minutes before you heat it, now the stone is ready to be prepared.
2. Turn on of the kitchen stove (or you can use any other direct heating system). Fix on minimum degree centigrade for five (5) minutes. Your stone should be in direct contact with heat.
3. Increase the heat by moving the stoves dial to medium, for two more minutes. (Or you can use the direct flame of a candle). Use whatever is available and most comfortable for you to heat the stone.
4. Turn off the stove.

skin and rectal mucus and put the other one in contact with clitoris. The stone will emanate natural biomagnetic energy resonating to the skin, passing through the wrapped paper towel around the stone and penetrating in deeper layers energizing each meridians consequently regulating each cellular memory (DNA, RNA) and activating each programs. (*Do not put the hot stone on your skin directly unless the heat is tolerable, otherwise your skin will be burned!!!*) Keep the same wrapped stone as long as you can, unwrap the stone as the temperature of the stone decreases and put it back on the same point.

Based on my research experience, during almost 30 years, Anal Ring is in very close connection with lips energetically by thousands of meridians. Have you seen when Human Being gets older, lips gets shrunk and shrinking lines appear on upper and lower lips? I have seen the same age people get almost the same shrinkage on their Anal Ring.

You know as well that old age people can not control urine and stomach gas, stool etc...

As you get older the stone will help you:

- To control your urine.
- Beautiful strong lips with not drooling saliva and complete control of food particles during chewing food.
- Control your speech, and saliva splash.

Stronger →

- To control your fluctuance, stool and urine.
- * The usage of this stone has an accumulative effect. If you are more sick use it as much as you can until you feel the results (it may take some time at the beginning). If you are really healthy use it to maintain your immune system active as much as you want or need.

Caution:

1. Do not touch the stone directly when it is hot.
2. Use barbecue tongs, to pick it up or use a spoon or fork, whichever is available and comfortable and practical for you. For your protection, regarding "Hygiene" and protecting you from getting burned, please do not use the stone without a napkin or paper towel cover (dispose the napkin after use). You may wash the cooled stone with soap and water and dry it after use if is needed. If you want to share the stone with somebody else, wash it with soap and hot water very well rinse it completely before usage and the other person must follow the same usage instructions.
3. Don't use this stone if you are very lethargic or impaired and/or your sensory or motor nerves are slow enough to prevent you from feeling your skin well by any means or anything.
